Application No. 10/083,905 Attorney Docket No. 72928 Amendment dated March 31, 2004 Reply to Office Action of October 03, 2003

## Amendments to the Claims

## IN THE CLAIMS:

3

Please amend the claims 6-9 as follows:

- 1. (Previously canceled)
- 2. (Previously canceled)
- (Previously canceled)
- 4. (Previously canceled)
- 5. (Previously canceled)
- 6. (Currently Amended) A movable barrier operator having automatic force setting capabilities, the operator comprising:
  - a motor coupled to a movable barrier to be moved;
  - a temperature detector for detecting temperatures; and
- a controller operatively coupled to the motor and the temperature detector for <u>estimating motor temperature as a function motor operation and elapsed time and</u> commanding the motor to move at a maximum force, for changing the maximum force according to changes of <u>estimated</u> temperature <u>detected by the temperature detector</u>, and for controlling the motor to stop moving the barrier when the maximum force is exceeded.
- 7. (Currently Amended) A movable barrier operator according to claim 6, wherein the controller comprises:
- a controller for increasing the maximum force when a decrease in <u>estimated</u> temperature has been detected.

Application No. 10/083,905 Attorney Docket No. 72928
Amendment dated March 31, 2004
Reply to Office Action of October 03, 2003

8. (Currently Amended) A method of selecting force settings for a movable barrier operator, the method comprising: controlling the movement of the barrier in response to a maximum force setting;

detecting temperature changes; and

estimating motor temperature as a function of detected

temperature, motor operation and elapsed time; and

changing the maximum force setting according to the

temperature change detected.

9. (Amended) A method according to claim 8, wherein changing the maximum force setting comprises:

increasing the maximum force setting when a decrease in estimated temperature is detected.
